Response to Amendment

1. In response to the Office Action mailed 13 September 2007, applicant submitted a response filed 13 December 2007, in which the applicant amended claims 1 and 11-17 without adding new matter.

Allowable Subject Matter

2. Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance, as per applicant's remarks on pages 7-8 from 13 December 2007: "**Lau** does not teach or suggest the method disclosed in claims 1. In particular, **Lau** does not store at least one parameter for a deleted interpolation language model as a parameter for a backoff language model. At col. 2, lines 37-38 and lines 40-50, **Lau** discusses a deleted interpolation trigram model. However, the cited sections do not show or suggest storing any of the parameters of the deleted interpolation trigram model as a parameter for a backoff language model. The innovation of the current invention exists in the storage of at least one parameter for the deleted interpolation language model as a parameter for a backoff language model. Under a backoff modeling technique, if an N-gram is not found in the training data, the probability for the N-gram is estimated using a probability for a sequence of n-1 words and a backoff weight. This is substantially different from a deleted interpolation language model, like the one shown in Lau, where the probability of an N-gram is calculated as a linear interpolation of lower order n-grams. Thus, under the invention of claim 1, the parameters for one type of language model are being stored as parameters for a completely different type of language model. Since **Lau** does not discuss a backoff language model, it cannot show or suggest storing a parameter of a deleted

interpolation language model as a parameter of a backoff language model. As such, **Lau** does not show or suggest the method of claim 1 or claims 2-10, which depend therefrom.”

Regarding claim 11, “the parameter is then placed in a data structure as a backoff parameter for a backoff language model that substitutes a weighed lower order n-gram probability for an N-gram probability when the N-gram cannot be located in the backoff language model.” “**Lau** does not teach or suggest the computer-readable storage medium disclosed in claim 11. In particular, **Lau** does not show or suggest placing a parameter for a deleted interpolation language model in a data structure as a backoff parameter for a backoff language model. As noted above, a deleted interpolation language model is much different from a backoff language model. Since **Lau** does not discuss backoff language models, it does not show or suggest placing a parameter of a deleted interpolation language model in a data structure as a backoff parameter for a backoff language model. As such, claim 11 and claims 12-17 which depend therefrom, are patentable over **Lau**.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
